Journal of
MEDICAL SYSTEMS

Volume 15, Number 1 February 1991

CONTENTS

1991 UNIVERSITY OF TENNESSEE INFORMATION TECHNOLOGY CONFERENCE

ARTICLES

Introduction 1
Ralph R. Grams

The Use of X-Terminals as Clinical Workstations 3
Jack W. London, Daniel E. Morton, Deborah Polekoff, and John Reber

Using Neural Networks to Diagnose Cancer 11
Philip S. Maclin, Jack Dempsey, Jay Brooks, and John Rand

Analog-to-Digital Clinical Data Collection on Networked Workstations with Graphic User Interface 21
Dennis Lunt

A New Teaching Tool for Dental and Medical Schools: Multimedia CD-ROM on Dental and Skeletal Development 37
Arto Demirjian

A Model for Designing Intelligent Tutoring Systems 47
David G. Fowler

*Automated Analysis of Medical Text. II. Cognitive Strategy 65
Elmer R. Gabrieli and David J. Speth

*Pathologic Elements in the Planning of Information Systems: The Case of Hospitals in Quebec 79
Dominique J. Ferrand and Michel Chokron

*Iliad Training Enhances Medical Students' Diagnostic Skills 93
Michael J. Lincoln, Charles W. Turner, Peter J. Haug, Homer R. Warner, John W. Williamson, Omar Bouhaddou, Sylvia G. Jessen, Dean Sorenson, Robert C. Cundick, and Morgan Grant

*These articles are not part of the conference.

1991 UNIVERSITY OF TENNESSEE INFORMATION TECHNOLOGY CONFERENCE

ARTICLES

MDA-Image: An Environment of Networked Desktop Computers for TeleRadiology/Pathology 111
Mark. E. Moffitt, William R. Richli, Cesar H. Carrasco, Sidney Wallace, Stuart O. Zimmerman, Alberto G. Ayala, Robert S. Benjamin, Shirley Chee, Paul Wood, Peggy Daniels, Shan-Qun Guo, John Grossman, and Dennis A. Johnston

Significant Efficiency Findings while Controlling for the Frequent Confounders of CAI Research in the PlanAlyzer Project's Computer-Based, Self-Paced, Case-Based Programs in Anemia and Chest Pain Diagnosis 117
Harold C. Lyon, James C. Healy, James R. Bell, Joseph F. O'Donnell, Edward K. Shultz, Robert S. Wigton, Frank Hirai, and J. Robert Beck

A Very Large PC LAN as the Basis for a Hospital Information System 133
John P. Glaser, Robert F. Beckley, Pasha Roberts, James K. Marra, Frederick L. Hiltz, and Jean Hurley

*BioSYNTHESIS: Access to Knowledge Network of Health Sciences Databases 139
Naomi C. Broering, Jeffrey S. Hylton, Robert Guttmann, and Dawn Eskridge

*The Use of Graphic Design in an Interactive Computer Teaching Program 155
Matthew S. Nixon, Elliot K. Fishman, Donna Magid, Joseph G. Hennessey, and Derek R. Ney

*An Inventory Model for Optimizing Purchasing of Intravenous Fluids for Hospitals: A Case Study 171
N. K. Kwak, Elizabeth Durbin, and Diane Stanley

*Quality Assurance Tracking or "Finding the Needle in a Haystack" 183
Anthony B. Kirtland

*These articles are not part of the conference.

CONTENTS

ARTICLES

Health Managers' Attitudes Toward Robotics and Artificial Computer Intelligence: An Empirical Investigation 197
Jay S. Mendell, Dennis S. Palkon, and Michael William Popejoy

A Multicenter Study of Data Collection and Communication at Primary Health Care Centers 205
K. Moidu, O. Wigertz, and E. Trell

Micro-Mainframe-Link Personal Clinical Research System 221
Tomohiro Odaka, Yoshiaki Watanabe, Sunao Moriguchi, Kouhei Akazawa, Mituo Simada, Maki Sakamoto, Taturo Kamakura, and Yoshiaki Nose

The Longwood Medical Area Network 229
John P. Glaser, Richard Harrison, and Peter Wall

AUTRES—The Johns Hopkins Hospital Automated Resume 237
Raymond E. Lenhard, Jr., James P. Buchman, Stephen C. Achuff, Stephen N. Kahane, and Christopher J. Macmanus

A Stochastic Model for Determining the Necessary Staff Level in a Service Industry 249
Angus Jeang and Donald R. Falkenberg

*Making the Transition from Information Systems of the 1970s to Medical Information Systems of the 1990s: The Role of the Physician's Workstation 257
J. E. Hammond, R. G. Berger, T. S. Carey, R. Rutledge, T. J. Cleveland, J. P. Kichak, and C. F. Ayscue

*This article was presented at the 1991 University of Tennessee Information Technology Conference

CONTENTS

ARTICLES

A New Microcomputer Software System Evaluation Paradigm: The Medical Perspective 269
Peter Kokol

An Assessment of the Radiological Module of NEONATE as an Aid in Interpreting Chest X-Ray Findings by Nonradiologists 277
Arie Franco, Jerald D. King, Fred L. Farr, Justin S. Clark, and Peter J. Haug

Experience Using the CQI Model in Health Care Management 287
Bernie Minard

*A Distributed Approach to Integrated Inquiry and Display for Radiology 299
M. Steven Wimmer, G. James Blaine, R. Gilbert Jost, Stephen M. Moore, and James W. Studt

A Random Allocation System with the Minimization Method for Multi-Institutional Clinical Trials 311
Kouhei Akazawa, Tomohiro Odaka, Maki Sakamoto, Shigeaki Ohtsuki, Mitsuo Shimada, Tatsuro Kamakura, and Yoshiaki Nose

*This article was presented at the 1991 University of Tennessee Information Technology Conference

CONTENTS

ARTICLES

Computer Rx: More Harm Than Good? 321
Ronald Wall

Designing Clinical Protocols for Optimal Use: Measuring Attributes of Treatment and Cancer Control Trials 335
James E. Veney, W. Paul Kory, Janet M. Barnsley, and Arnold D. Kaluzny

Developing a Management Information System for a Hospital: A Case Study on Vendor Selection 345
Bor-Yi Tsay and Joseph R. Stackhouse

Designing an Outcome-Oriented Computer Decision-Support System for Cardiovascular ICU—A Preliminary Report 359
Francis Lau, Daniel Vincent, Don Fenna, Randy Goebel, and Dennis Modry

Migrating a Clinical Laboratory Information System Between Technologies 379
Arthur A. Eggert, Kenneth A. Emmerich, Thomas J. Blankenheim, Donald J. Becker, Gary J. Smulka, and Karen L. Bowers
